Market announcement – iQX equity crowd-funding platform Capital Labs launches new investment offer driving Australia’s next era of patient care

iQX Limited (NSX:iQX), a member of The iQ Group Global, today announced that Capital Labs, the equity crowd-sourced funding platform of its subsidiary iQX Investment Services Pty Ltd (AFSL 451144), has launched a new investment offer.

One of the first ASIC authorised equity crowd-funding platforms in Australia, Capital Labs only partners with companies launching technology and innovations that have a positive impact on Australia’s future.

For innovative companies, Capital Labs provides a full-service capital raise offering, utilising the investment banking and specialised marketing expertise of The iQ Group Global enterprise. For investors, Capital Labs provides access to early-stage retail investment opportunities in innovative companies and technologies in a variety of sectors.

Capital Labs is pleased to announce its partnership with Greenfield MC Global, a medicinal cannabis enterprise focused on the development and distribution of pharmaceutical-grade medicinal cannabis products for the Asia Pacific region. The offer is live on the platform and open to investors, following an initial testing period.

“At Greenfield MC Global, we strive to help shape this new era in patient care,” said Arjun Chhabra, Chairman and President, Greenfield MC Global.

“We are delighted to partner with Capital Labs to invite retail investors, who believe it’s time for this change in Australia and the Asia Pacific, to participate in this raise,” he said.

Dr. George Syrmalis, Chief Executive Officer of The iQ Group Global, said the offer aligns with the core mission of Capital Labs.

“Capital Labs is a platform for Australians who believe in investing in positive change,” Dr Syrmalis said.

“Providing retail investors the opportunity to fund companies bringing meaningful innovations to market in sectors alongside life science, Capital Labs exemplifies iQX Limited’s commitment to creating a new future for innovation,” he said.
